3. SPECIAL INFORMATION ABOUT BLUELINK AND SYSTEM LIMITATIONS

- A. **Availability.** Bluelink is only available in the geographic coverage area of Wireless Carrier, as amended from time to time. Even in the geographic coverage area, the availability of Bluelink can be interrupted either due to network problem of the Carrier or other Force majeure events detailed in Clause 3 (G) mentioned below. Bluelink works using the wireless communication networks of Wireless Carrier and the Global Positioning System (“GPS”) satellite network. Not all interactive features/digital services are available through the Application everywhere, if your Device does not support, particularly in remote or enclosed areas, or on all vehicles, at all times. The area that you are driving in may affect the type or quality of Bluelink that we can provide to you, including, but not limited to, routing service. Additionally, some Bluelink interactive features/digital services may not be fully available if the GPS system is not working. Certain programming limitations of the GPS system may impair our ability to determine your vehicle’s precise location. Road Side Assistance (RSA) shall not be part of paid Bluelink subscription. You shall procure RSA, if required, separately at your own cost
- B. **Technology and Communications.** Bluelink can work if you are in a place where the Wireless Carrier has coverage, network capacity, and reception and technology that is compatible with the Bluelink. Bluelink that involves location information about your Vehicle cannot work unless GPS satellite signals are unobstructed, available in that place and compatible with the BlueLink System as well. For the proper function of Bluelink features or availing its services, fully functional AVNT and uninterrupted internet / network connectivity is required. Hence, if AVNT stops functioning or internet / network connectivity is interrupted due to any reason, Bluelink will stop working immediately. The repair, if any, to make AVNT fully functional shall be at the cost of the owner only.
- C. **Vehicle and Equipment.** The Bluelink is provided using BlueLink System installed in your Vehicle which receives GPS signals and communicates with the Customer Care center via wireless and landline communications networks. The BlueLink System is not intended to place or receive personal calls and may only place calls to our Service Providers. Your Vehicle has to have a working electrical system (including adequate battery power) for the Bluelink System to operate. You may need to increase the volume of your radio to hear operator services from the BlueLink System. Bluelink may not work if your BlueLink System is not properly installed or you have not maintained it and your Vehicle is not in good working order and in compliance with all government regulations. If you try to add or modify any equipment or software in your Vehicle including the BlueLink System, the Bluelink may not work and we can terminate your Bluelink. Your

BlueLink System needs to be compatible with the Bluelink and the wireless service and technology provided by us. If your Vehicle does not have an ignition cycle after 168 hours (i.e., 7 days), certain Bluelink Services may not be available until the Vehicle is started.

- D. **Geography and Environment.** There are other problems we cannot control that may prevent us from providing Service to you at any particular time or place, or that may impair the quality of the Bluelink. Some examples are hills, tall buildings, tunnels, weather, damage to important parts of your Vehicle in an accident, or wireless network congestion.
- E. **Maps and Navigation.** The routing and map data that the Application provides is only to assist you in identifying the direction/location and is based on the most current map information made available by the Service Provider and it may be inaccurate or incomplete. For example, routing data may not include information about one-way roads, turn restrictions, construction projects, seasonal roads, detours or new roads. It may suggest using a road that is now closed for construction or a turn that is prohibited by signs at the intersection. In addition, traffic, weather and other events may cause road conditions to differ from the results generated. Therefore, you should always use good judgment and it is your responsibility to obey traffic and roadway laws and instructions and evaluate whether it is safe and legal based on current traffic, weather and other conditions to follow the directions provided by the BlueLink System and Bluelink. Other than as expressly set forth herein, neither Hyundai nor its Service Provider make any specific promises about the routing data provided hereunder (i.e., we do not make any commitments about the content within the routing data, or its reliability, availability, or ability to meet your needs – the routing and map data is provided “as is”). You acknowledge and agree to be bound by Service Provider’s Terms of Use.
- F. **Available Information.** The Bluelink may be limited to geographic areas where routing and map data and emergency contact information is available in our databases, which may be less than that which is otherwise generally available. Additionally, the Bluelink may be limited based on the information provided by Service Providers.
- G. **Force Majeure.** In addition to the limitations contained in Clause 3(A) above as to the availability of Bluelink, you agree that performance of Application or Service and/or functionality of the Blue link System or availability of Blue link shall at all times subject to Force Majeure events, such as act of god, war, insurrection, riots, natural disaster, weather, fire, strike, atmospheric/geographical hindrances, equipment or facility shortage, government actions/regulations, terrorism, civil disturbances, equipment failures including global positioning system, wireless networks, internet, computer, telecommunication, and other events which are beyond the control of Hyundai or Service Providers or Wireless Carrier. In the event of occurrence of any Force Majeure events, the obligations of Hyundai or Service Providers or Wireless

Carrier as mentioned in this Terms and Conditions shall automatically remain suspended and accordingly Hyundai or Service Providers or Wireless Carrier shall not be responsible or liable, if any loss or damage is caused due to failure or delay or interruptions in providing the Blue link services or in performing of its obligations, consequent to such Force Majeure events.

If that happens, we will notify you of the effective date of cancellation and describe our and your respective rights and obligations.
